1/12

Before any website goes live, it has to pass these 10 checks.

Swipe →

01

Open it on a phone.

Every page, not just the home page.

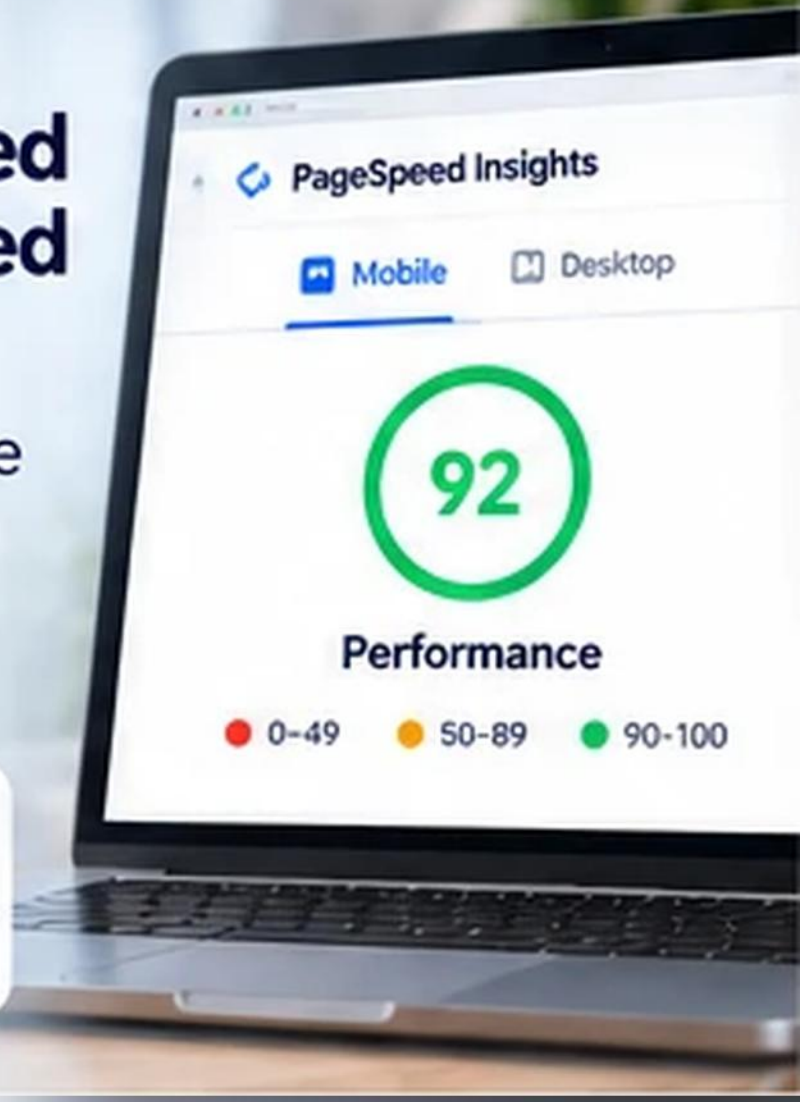

- Check all main pages
- Menus work
- Looks good on mobile

02

Test the speed on PageSpeed Insights.

Check the mobile score.

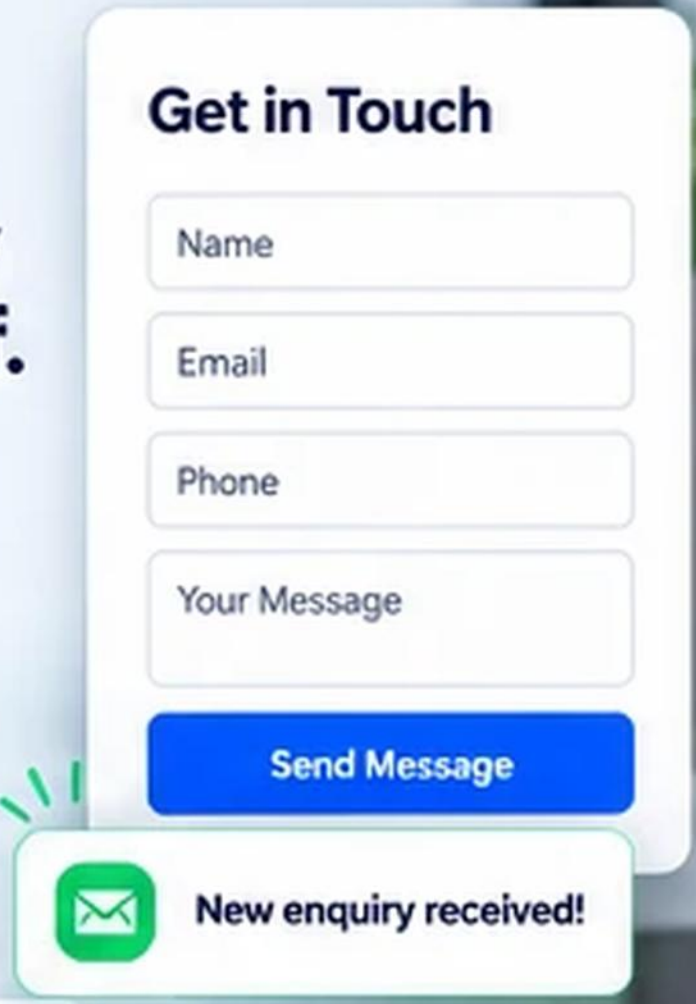

- Aim for a good mobile score (green zone).

03

Submit every form yourself.

Does the enquiry actually arrive?

- Test all forms
- Check your email
- Check spam folder too

5/12

04

Tap the call and WhatsApp buttons.

Do they open the right number?

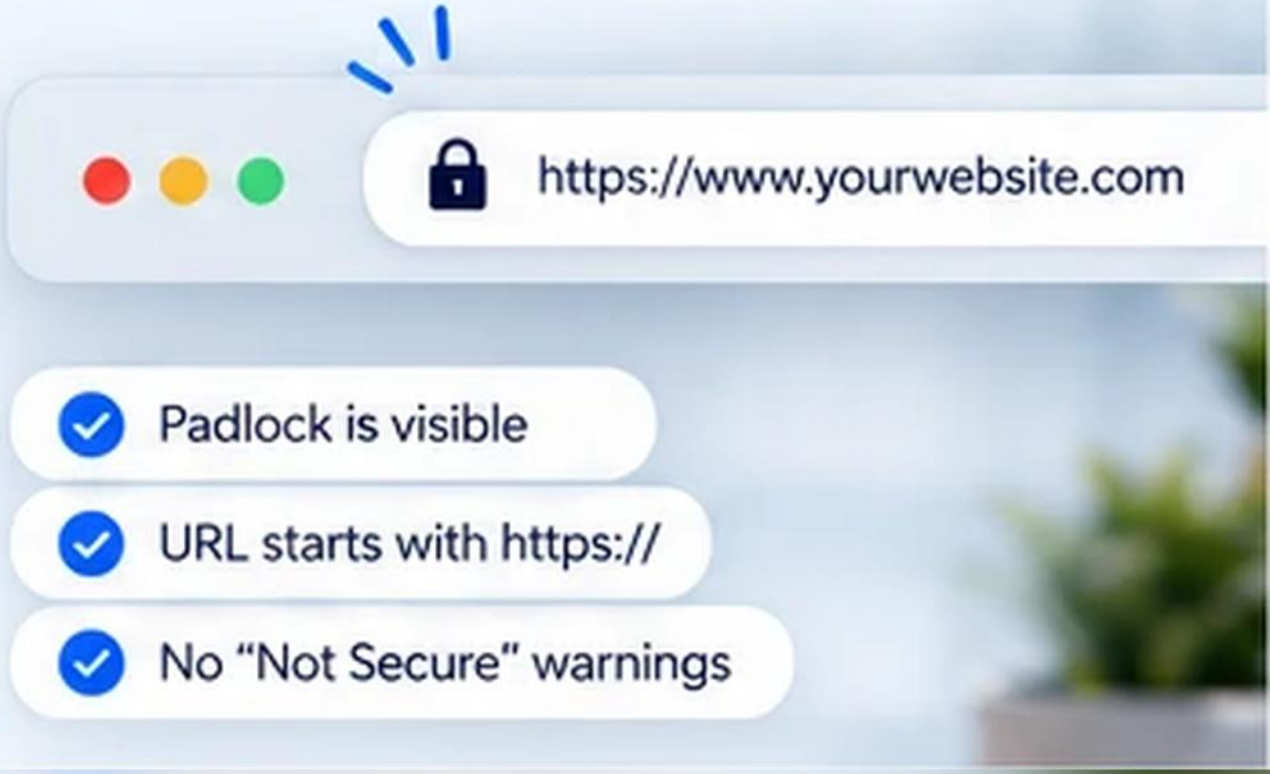

- Opens correct number
- Works on mobile
- Works on desktop

6/12

05

Check for the padlock (https) on every page.

06

Give every page its own title and description for Google.

Google

Service Name | Your Business | City

https://www.yourwebsite.com/service

Short, clear description about the page (150–160 characters).

- Unique title for each page
- Unique description for each page
- Include main keyword and city (if local)

8/12

07

Set up Google Analytics and Search Console before launch, not after.

Google Analytics 4

Track website traffic from day 1.

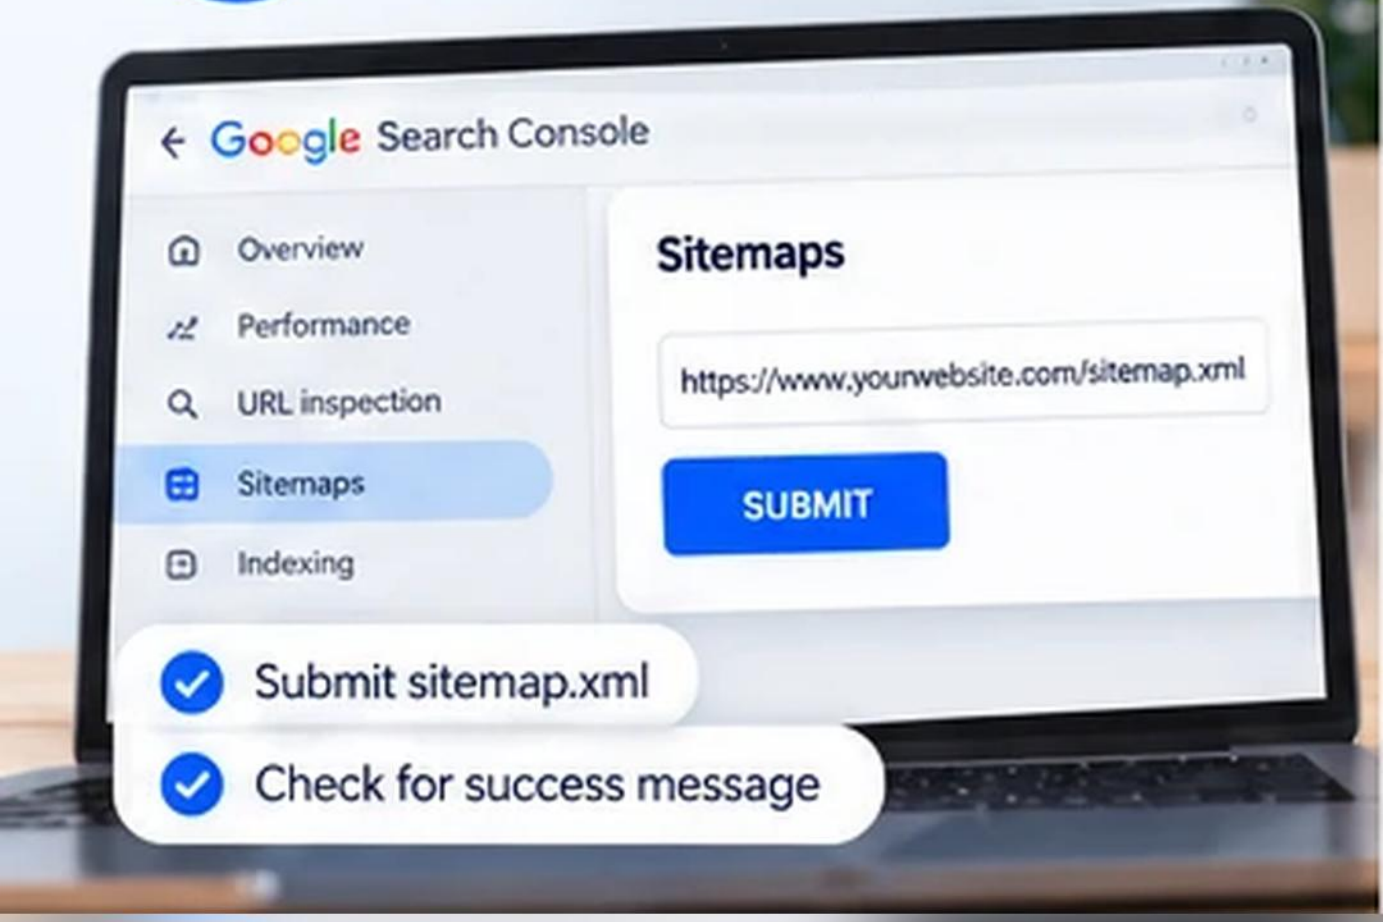

Google Search Console

Find and fix issues early.

9/12

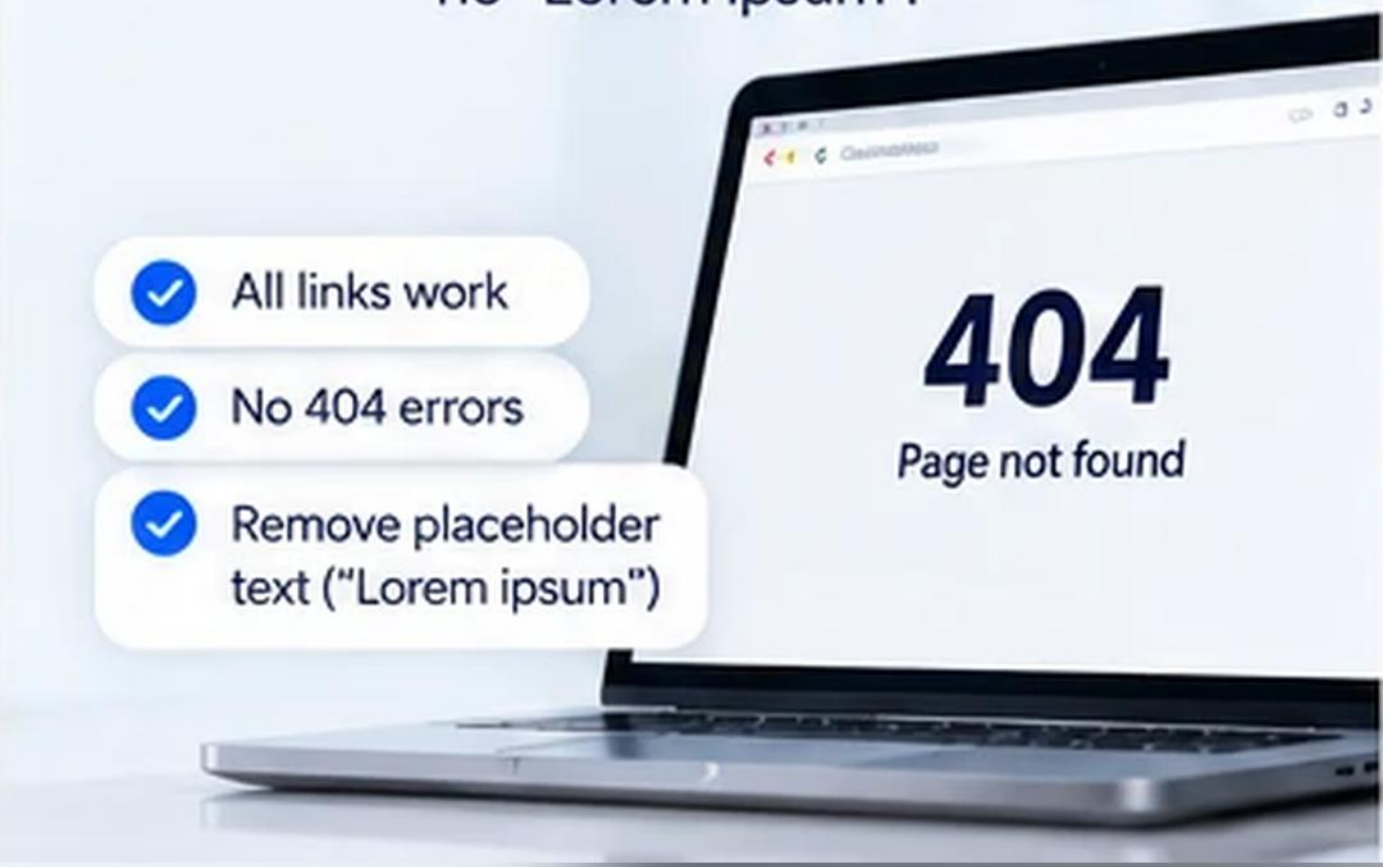

08 Submit the sitemap in Search Console.

09

Click every link.

No broken pages,
no “Lorem ipsum”.

- All links work
- No 404 errors
- Remove placeholder text (“Lorem ipsum”)

10

Make sure the name, address and phone match your Google Business Profile.
